Tove Mattsson is a European Patent Attorney at Papula-Nevinpat. She has been working with us since 2024.

Tove has long and broad experience in patent attorney work as of 2001, when she began her IP career as a thesis worker in a Finnish patent firm. Tove's patent expertise includes identifying and handling inventions, drafting and prosecuting patent applications internationally, providing expert statements, and counseling in infringements and various other IP related questions.

Tove has handled a wide variety of assignments relating to mechanics and ICT. Her experience includes inventions in the fields of glass tempering, software, manufacturing technology, metallurgy and mining equipment. She has worked with start-ups and established industrial companies alike.

### Technical fields
