Aleksandr Belotcerkovskii is a European Patent Attorney at Papula-Nevinpat. He is also the Head of Local Agent Network.

Aleksandr started his intellectual property career at Papula-Nevinpat's St. Petersburg office as a part-time translator and then moved on to work as a full-time patent specialist from 2008 to 2010. His tasks included handling Russian patent applications and providing legal advice regarding the Russian patent law.

Aleksandr joined Papula-Nevinpat's head office in Helsinki as a patent specialist in 2010 and is responsible for various assignments involving drafting and prosecution of patent applications, consulting clients in patenting matters and analyzing potential infringements.

Technical fields

Material science
Nanotechnology
Physics
Semiconductors

Core expertise

Carbon nanotubes, Crystal growth, Graphene, Mobile work equipment, Nanoelectronics, Nanostructures, Optoelectronics, Polymers, Sensors, Solar cells, Wearable electronics

Languages

Russian, English, French (and Finnish)

Education

B. Sc. (physics), Saint Petersburg State Polytechnica University, 2009 Currently an undergraduate Master student at Hanken School of Economics, major: Intellectual Property Law
