firstname.lastname@papula-nevinpat.com

Matti Ylitalo is a European Patent Attorney at Papula-Nevinpat. He joined our team in 2018, and works at our Tampere office. Matti is also a partner in the company.

Matti has more than 20 years of experience as a patent attorney. He has identified and assessed inventions, conducted searches, drafted and prosecuted patent and utility model applications, participated in opposition and infringement proceedings, and prepared statements, IP guidelines and IP strategies.

Matti serves our clients in any assignments relating to engineering materials, mechanical engineering, and process engineering. His wide expertise covers industrial automation and handling systems, vehicles and their accessories, power transmission solutions and power units, filter equipment, combustion and boiler technology, plastic processing equipment, coating technologies, medical instruments, and antenna solutions. In addition, he is familiar with applications of plastic materials in medicine and the electronics industry. Matti is also happy to provide training for our customers on IP related issues.

Technical fields

Automation
Construction engineering
Energy technology
Material science
Mechanical engineering
Mechanics
Medical engineering
Mineral processing and metallurgy
Process engineering
Wood processing

Languages

Finnish, english

Education

Master of Science (Technology), Tampere
University of Technology

Core expertise

Combustion, Energy production, Environmental technology, Fire prevention, Flotation, Hydraulics, Industrial automation, Machine automation, Manufacturing, Material handling systems, Medical devices, Mobile work equipment, Packaging, Paper machines, Polymer machining tools, Polymers, Power units, Renewable energy, Shipbuilding, Waste treatment
