Tuula Rintamäki is a European Patent Attorney and US Patent Agent at Papula-Nevinpat. She has been working with us since 2021, and is based in our Tampere office.

Tuula has long and wide experience as a patent attorney, and she is especially familiar with the US Patent Office practices. Here at Papula-Nevinpat she focuses on evaluating inventions, drafting and prosecuting patent applications, conducting searches, and counseling our customers in infringements and other IP-related questions.

Tuula's expertise covers a wide variety of inventions in the fields of mechanics as well as telecommunications. She specializes in mobile work equipment, machine control, machine shop technology and manufacturing, construction solutions, mining equipment, vehicles and their auxiliary equipment, power transmission solutions and power units, combustion and boiler technology, plastics processing equipment, and traffic control systems.
