Andreas Hammer has been working at Papula-Nevinpat since September 2022 when he joined our ICT and Electrical Engineering Team as a trainee patent attorney. Before patents, he worked at Aalto University in research and teaching specializing in analog electronics, including both low and high frequency circuits (+100 GHz). He has also experience in DSP and audio programming in the field of effects and synthesizer design.

Technical fields

Electronics

Energy technology

Radio technology

Core expertise

Analog electronics, Digital electronics, Energy production, MEMS, Microelectronics, Nanoelectronics, Renewable energy, RF electronics, RF technology, Sensors, Solar cells
