Kristina Sorochkina is a patent specialist in Papula-Nevinpat's Chemistry and Process Technology team. She received a M. Sc. degree in chemistry from the Lomonosov Moscow State University. Currently, she is finalizing her doctoral dissertation in chemistry at the University of Helsinki.

Kristina has more than 10 years of research experience in international research groups and part of her research work has been published in international journals. Her major is organic chemistry and catalysis, but she has also developed broad expertise in related fields, such as chemical analysis, polymer and medicinal chemistry.

### Technical fields

Chemistry

### Core expertise

Biofuels, Chemical engineering, Organic chemistry, Pharmaceuticals, Polymers

### Languages

English, Russian, (Finnish)

### Education

M. Sc., Lomonosov MSU, Ph. D. candidate (present), Helsinki University
